Report on Industrial Training

At

MARAZIN (PVT) LTD

Kalmunai

Advanced Technological Institute
Sammanthurai.

Name : W. Mohammed Jumail
Student No : SAM/IT/2021/F/0039
Course : Higher National Diploma in Information Technology
Field : Information Technology
Period : Six Months (06th of August 2024 - 05th of February 2025)

DECLARATION

I am Mohamed Jumail, a student of Advanced Technological Institute, Sammanthurai, hereby declare that the industrial training report submitted is a true and authentic record of the work carried out by me during the period from 06th August 2024 to 05th February 2025 at MARAZIN (PVT) LTD, Kalmunai. This industrial training was completed under the supervision of Mr. Mohamed Mansoor Matheen (CEO and Director), who served as my training in charge.

I hereby affirm that the content of this report is my own work and has not been previously published or authored by anyone else. Additionally, I confirm that the results presented have not been submitted to any other university or institution for any degree or qualification.

This declaration serves as my formal commitment to ethical academic practices and my acknowledgment of the importance of original work. I take full responsibility for the content of this report and attest to its accuracy and originality. I hope this report meets the expectations set forth by the Advanced Technological Institute, Sammanthurai, and I look forward to future academic pursuits.

PREFACE

My industrial training started on the 06th of August 2024. At the successful completion of the training module which was conducted by the National Apprentice and Industrial Training Authority. I would be glad to present this report which would provide an insight into the overall training I received from MARAZIN (PVT) LTD. This report will provide insight into my training program and the projects I worked on during the 6 months period. The industrial training provided valuable technical knowledge and exposure in my industry, enabling me to develop practical skills and experience. Its ultimate aim was to prepare me for full-time employment in my areas of specialization.

ACKNOWLEDGEMENT

Firstly, I would like to express my gratitude to God for enabling me to successfully complete my Industrial Training Report. I am sincerely thankful to Marazin (Private) Limited for providing me the opportunity to undertake my six-month industrial training at their facility. This experience has allowed me to gain valuable knowledge and skills through practical work in a professional environment.

I extend my deepest gratitude to the technical and non-technical staff at Marazin (Private) Limited for their exceptional guidance. Without their support, I would not have been able to navigate the workplace environment successfully.

I also wish to express my heartfelt appreciation to my family, friends, and everyone who supported and encouraged me throughout this journey. Additionally, I would like to convey my sincere thanks to my NAITA supervisor for their direct guidance and oversight during this training period, as well as to the National Apprentice and Industrial Training Authority (NAITA) for their invaluable support.

Finally, this training experience has been instrumental in enhancing my professional skills and shaping my understanding of the industry. It has not only strengthened my technical abilities but also taught me the value of teamwork, resilience, and continuous learning. I look forward to applying these lessons in future academic and professional endeavors.

Thank you.

Mr. W. Mohammed Jumail

CHAPTER SUMMARIES

I had my six months training experience at MARAZIN PVT (LTD), Kalmunai. I was got experience in IT industry. This report is the final document that includes all the information about the training organization, and the training experience that I have obtained during this period. Here in this report, I present the experience knowledge. Skills I had during the training period. The report contains three chapters.

Chapter 1: Introduction to the Training Establishment

This chapter provides an overview of the organization, including its background, objectives, vision, mission, core values, and functions. It also details the address and location of Marazin (Private) Limited, the objectives and scope of the internship, the duration of the training, the organizational structure, and the projects I was involved in during the internship.

Chapter 2: Training Experience

This chapter outlines the key activities I engaged in during the training, including Web Development, Full stack Development (Laravel, PHP, HTML, CSS, JavaScript and jQuery), and UI Design (Figma). It focuses on the knowledge and skills I acquired, the internship project, notable experiences, interactions with staff, and the techniques used throughout the internship, such as discussions, practical tasks, teamwork, and the areas of expertise I encountered.

Chapter 3: Conclusion

It describes training establishment provided a well-rounded experience, offering both theoretical and practical knowledge that was highly relevant to the internship. Its structured approach, combined with real-world exposure, ensured that the learning aligned with industry standards. Mentorship from experienced professionals enhanced skill development, fostering both technical and soft skills. Overall, the training environment was supportive, making the experience valuable and directly applicable to the internship. .

ABSTRACTION

During the past 06 months, I have had the opportunity to develop my skills and gain valuable experience through my internship.

Training is part of a college curriculum that aims to train and orient students about the work and their future career. Training period is very important not only to teach students their chosen career but to show students the reality about working. So, with deepest gratitude and appreciation, I humbly give thanks to the people who helped me in making my training a possible one.

I am extremely thankful to MARAZIN (PVT) LTD for the support and permission to render my training to their Company. And to all staff of MARAZIN (PVT) LTD who had played a major part in the acquisition of my training, for imparting their skills, knowledge, and for treating me not as an employee but as a part of their family. A word of appreciation to Mr. Mohamed Mansoor Matheen (CEO and Director), for the knowledge, support, and for those inspirational words that he had shared with me. Thank you for believing in my skills and capabilities.

I would like to pay my gratitude to the following for contributing towards the successful completion of this industrial training. With regarded to Sri Lanka Institute of Advanced Technological Education (SLIATE) for giving this kind of opportunity. Head of the ICT department and lectures those who help me to get opportunity for my industrial training. Finally, I would like to express my sincere gratitude to the National Apprentice and Industrial Training Authority (NAITA) for providing me the facilities to undergo a well standard training session. And also, I would like to thank to all of you who had been with me in the completion of the requirements

In conclusion, the industrial training program at MARAZIN PVT (LTD) was a comprehensive and well-rounded experience that has equipped the software and web developer with the skills, knowledge, and confidence needed to succeed in the field.

CHAPTER 01

1.0 Introduction

1.1 About Training Organization

1.1.1 Nature of Business

During my training placement, I had the privilege of working with MARAZIN (PVT) LTD, a reputable company situated in Kalmunai, Ampara. Marazin (Private) Limited specializes in delivering comprehensive software development and digital business solutions, catering to a diverse range of clients. Established in 2020, the company has rapidly grown its portfolio, successfully serving over 100 clients and completing more than 200 projects to date. This impressive track record is a testament to the dedication and expertise of their team, which comprises more than 20 seasoned professionals committed to excellence in their respective fields.

Throughout my journey at Marazin (Private) Limited, I was immersed in various facets of software development, Graphic Designing which provided me with a well-rounded and practical understanding of the industry. I actively participated in web design projects, where I learned to create user-friendly and aesthetically pleasing websites that meet client specifications and enhance user experience. Additionally, I was involved in the development of web Development, gaining hands-on experience with the latest technologies.

Moreover, the experience reinforced the importance of effective communication and teamwork in achieving project goals. I collaborated closely with different departments, including project management, design, and development teams, to ensure that projects were delivered on time and met the high standards expected by clients.

Overall, my training placement at Marazin (Private) Limited was a transformative experience that significantly enhanced my technical abilities and provided a deeper understanding of the industry. It has prepared me to future challenges with

confidence and has solidified my commitment to pursuing a career in software development and digital solutions.

Currently, MARAZIN (PVT) LTD operates by doing the following services:

- **Web Design:** Marazin (Private) Limited creates attractive and easy-to-navigate websites tailored to each brand's specific needs, ensuring a smooth online experience for users.
- **Web Application:** The company develops custom web-based solutions to meet unique business needs, improving functionality and streamlining processes.
- **Billing Systems:** Marazin (Private) Limited offers automated billing systems that help businesses simplify financial tasks, ensuring accurate and timely transactions.
- **WhatsApp Marketing:** The company uses WhatsApp to help businesses connect with their audience through targeted campaigns that boost engagement and reach.
- **Educational Mentorship:** in addition to their digital solutions, the company provides mentorship aimed at supporting educational development and inspiring success.

The internship program at MARAZIN (PVT) LTD has opened valuable opportunities for students in higher education, enabling them to gain practical experience and deepen their knowledge. The company emphasizes quality, accountability, personal growth, and discipline, embedding these core values firmly within its organizational culture.

1.2 Co-Operate Plan

1.2.1 Vision

Our vision at Marazin (Private) Limited is to be a leading provider of innovative and reliable technology solutions that empower businesses to achieve their goals and improve the lives of their customers. We are committed to delivering exceptional customer service and support, building strong partnerships with our clients, and fostering a culture of continuous improvement and innovation among our employees. Our ultimate goal is to be recognized as a trusted advisor and partner for businesses seeking to harness the power of technology to achieve their full potential.

1.2.2 Mission

Our mission is to deliver optimal solutions with top quality and best services at affordable prices. In Our Business Policy Customer satisfaction is given top priority. Our team is very friendly in dealings to the customers and it helps us to retain lifelong relationship with our existing clients and expand our customer circle worldwide. We always try to improve the quality of our products by exploring innovative ideas and new techniques. We always try to enhance efficiency, productivity and capability of businesses by delivering the services above and beyond industry values and customer expectations. We allow the businesses to expand their boundaries by making innovative and impeccable business partnership with us. We visualize our organization to be the first and the last stop for the businesses across the globe seeking out for long-term success and prosperity with the help of our team.

1.2.3 Goals

- Develop innovative software solutions that address the changing needs of businesses and industries.
- Build user-friendly software that is easy to learn and use, even for non-technical users.
- Deliver reliable and scalable software solutions that can handle large volumes of data and users.

- Provide exceptional customer service and support throughout the entire software development process, from initial consultation to ongoing maintenance and upgrades.
- Build long-term relationships with clients and work closely with them to understand their unique needs and challenges.
- Stay up-to-date with the latest technology trends and invest in ongoing research and development to ensure that our software solutions remain cutting-edge.
- Empower our clients to achieve their business objectives through the use of our software solutions, and help them increase efficiency, reduce costs, and improve productivity.
- Foster a culture of creativity, collaboration, and continuous improvement among our software development team.
- Build a reputation for excellence in the software industry and become a trusted partner for businesses of all sizes and industries.
- Create a positive impact on society by developing software solutions that improve people's lives and contribute to sustainable development.

1.2.4 Objectives

- Increase services.
- Provide opportunities for teams to improve their skills.
- Increase employee satisfaction.
- Reach out to more community members.
- Provide more reliable Services and Software products.

1.2.5 Strategic Planning

- Top Tech Talent Employer
- Highest Flexibility
- 360 – Degree Approach
- Designing
- Improve Accountability to Achieve Results
- Real-Time Results Dashboards
- Provide IT training and workshops
- Sponsor IT and Social Event.

1.2.6 Our team

Our team consists of talented professionals who collaborate closely to reach the objectives of our organization. We are driven by a strong commitment to quality, cooperation, and innovation.

We work together in a highly effective and collaborative manner, focusing on shared goals. Open and frequent communication is a key part of our workflow, as we regularly exchange ideas and insights to continuously enhance our performance.

Figure 5: Trainees

Figure 4: Trainee with staffs

1.3 MARAZIN (PVT) LTD Services

1.3.1 Offering Services

- **Web Designing:** At MARAZIN (PVT) LTD, web designing is carried out using WordPress, which allows the team to build responsive and visually appealing websites. The company prioritizes user-friendly design principles, ensuring a seamless experience across devices. By leveraging WordPress's versatile plugins and themes, the team creates customized solutions that align with client goals. This approach also facilitates efficient website management and updates, allowing for consistent performance and engagement. The result is an optimized and accessible digital presence for the company and its clients.
- **UI Designing:** UI design at MARAZIN (PVT) LTD is conducted through Figma, a powerful tool for crafting visually engaging and intuitive interfaces. The focus is on creating layouts that enhance user interaction and streamline navigation, improving overall user satisfaction. Figma's collaborative features allow the team to share and refine designs with ease, ensuring alignment across departments. This efficient workflow promotes timely feedback and quick adjustments, enhancing the project outcome. The UI designs ultimately elevate the user's journey and reinforce brand consistency.
- **Video Editing:** Video editing is an essential part of MARAZIN (PVT) LTD digital strategy, using software such as Cap Cut and Adobe After Effects. The team creates captivating introductory videos, logo animations, and feedback compilations to enhance branding. These videos are edited to be engaging and polished, suited for YouTube and other platforms. By focusing on clear storytelling and visual quality, the video content effectively represents the company's standards. This editing approach ensures that each piece aligns with the company's identity and audience expectations.
- **Graphics Designing:** Graphic design at MARAZIN (PVT) LTD relies on Adobe Photoshop and Illustrator for developing high-quality promotional materials. The design team creates visually compelling course posters,

infographics, and advertisements that reflect the company's brand values. Each design is crafted to attract attention, convey essential information, and drive engagement. These graphics support various campaigns across digital channels, reinforcing brand awareness. By maintaining a consistent aesthetic, the team strengthens brand identity and professionalism.

- **ERP System:** The company's ERP system streamlines operations, integrating processes like inventory management, sales, and customer relations. This comprehensive system allows real-time tracking, improving decision-making and productivity.
- **Digital Marketing:** Digital marketing is a vital part of MARAZIN (PVT) LTD strategy, combining SEO, social media, and email campaigns to reach a broader audience. The team creates targeted content to engage users on platforms such as Facebook, Instagram, and LinkedIn. Data analytics is utilized to monitor campaign performance, refining efforts based on real-time feedback. This approach ensures that marketing strategies are effective and cost-efficient. By staying updated on market trends, the team continuously enhances its digital outreach and brand visibility.

1.3.2 Offering Programs

Professional Courses:

- UI/UX Designing (Adobe XD and Figma)
- Graphics Designing (Adobe Photoshop and Adobe Illustrator)
- WordPress (Elementor)
- Digital Marketing

1.4 Technologies

1.4.1 Industry Focuses

- Education
- Health
- Finance and Accounting
- Logistics
- Business management
- IT Consultancy
- Maintenance and Support

1.4.2 Key Technologies

- **Desktop Application:** Java, .NET, C#
- **Web Development:** HTML, CSS, JS, React, PHP, Laravel, WordPress
- **Database:** MYSQL, Firebase, MS Access
- **Graphic Design:** Adobe Photoshop (PS), Adobe Illustrator (AI), Canva
- **Video Editing:** Adobe Premiere Pro, Adobe After Effects, Cap cut, Audacity, Adobe Audition

1.5 Management Organizational Resource

1.5.1 Provision of Resources

Responsibility: CEO/Director

The CEO serves as the company's top executive, overseeing critical corporate decisions and steering the organization's overall operations and resource management. This role is essential for setting strategic direction and ensuring that the company's goals and objectives are effectively pursued.

1.5.2 Human Resources

Responsibility: HR Manager

The Human Resource Manager will unmanipulated and direct the routine functions of the Human Resources (HR) department including hiring and interviewing staff, administering pay, benefits, and leave, and enforcing company policies and practices.

1.5.3 Infrastructure

Responsibility: CEO, Maintenance Officer

The manager is responsible for ensuring that the company's facilities and equipment are in proper working condition, overseeing repairs and maintenance as required. Tasks like performing basic plumbing, carpentry, and general upkeep are common duties typically assigned to a Maintenance Officer.

Figure 7: Team Meeting room

Figure 6: Staff working area

Figure 8: Office waiting room

CHAPTER 02

2.1 Training Experience

Industrial Training is a part of my Higher National Diploma in Information Technology (HNDIT) program, which is designed to provide hands-on experience relevant to my professional growth before graduation. The HNDIT program spans two years, and to complete it successfully, I am required to undertake an "Industrial Placement" for the final semester, lasting six months, in an organization with an IT-focused environment.

To meet this requirement, I began searching for a suitable IT placement. After exploring several options, I secured an opportunity to complete my training at MARAZIN (PVT) LTD, located in Kalmunai. I submitted a request to begin my placement on August 06, 2024, along with a formal letter of approval from our Head of Department at the Advanced Technological Institute (ATI).

Upon receiving my placement request, I met with Mr. Mohamed Mansoor Matheen, the Director and CEO of MARAZIN (PVT) LTD. He provided me with an official appointment letter and confirmed that I could start my training on or before August 06, 2024. During my training period, I developed skills in PHP, JavaScript, CSS, HTML, Bootstrap, and UI design. Working under the guidance of our CEO, Mr. Mohamed Mansoor Matheen, I was tasked with designing and building web applications. His mentorship ensured I met each client's needs and delivered successful projects, refining my technical and project management abilities.

I gained valuable insights into applying graphic design and development tools in real-world scenarios, which has equipped me for a future in IT. I am deeply appreciative of the support and training provided, as this experience has prepared me to embark confidently on my career path in the IT field. This chapter details the technologies and skills I utilized.

2.2 Technologies and Tools

2.2.1 Visual Studio (VS) Code

Visual Studio Code, commonly known as VS Code, is an open-source code editor created by Microsoft. It is tailored to assist developers in coding, testing, and debugging across multiple programming languages and frameworks. Compatible with Windows, Linux, macOS, and web browsers, VS Code features capabilities such as debugging, syntax highlighting, intelligent code suggestions, code snippets, refactoring tools, and integrated Git version control. Overall, it is engineered to boost productivity, facilitate collaborative development, and provide a customizable experience, making it an essential tool for developers working on diverse projects.

Figure 9: Logo of VS Code

Figure 10: VS Code Dashboard

2.2.2 HTML

HTML5 is the standard markup language for creating and organizing content on the web. It outlines the structure of web pages through a set of elements and tags. These elements, such as headings, paragraphs, links, and images, are processed by web browsers to present content in a clear and orderly manner. As the core building block of web pages, HTML establishes the basic structure upon which other technologies layer to develop interactive and visually engaging websites.

Figure 11: Logo of HTML

2.2.3 CSS

CSS is a stylesheet language that governs the look and layout of web pages. It lets developers style HTML elements with attributes like color, typography, spacing, and positioning. By using CSS, developers can craft attractive and uniform designs across various web pages. Additionally, CSS supports responsive design, enabling websites to adjust to different screen sizes and devices. This makes CSS essential in web development, enhancing both user experience and visual appeal.

Figure 12: Logo of CSS

2.2.4 JavaScript

JavaScript is a robust and adaptable programming language widely utilized in web development to generate dynamic and interactive website content. Unlike HTML and CSS, which focus on structuring and styling web pages, JavaScript allows for the creation of features such as animations, form validation, interactive maps, and live updates without needing to reload the page. Running directly in the browser, JavaScript is a crucial technology for client-side scripting. Its versatility extends beyond the web, as it is also used for server-side development in various environments. The flexibility and extensive support for JavaScript make it an indispensable tool in contemporary web development.

Figure 13: Logo of JS

2.2.5 Bootstrap

Bootstrap is a popular front-end framework for creating responsive, mobile-first websites. During my internship, I extensively used Bootstrap to develop responsive layouts that adapted seamlessly to various devices. Its grid system, components, and utilities allowed me to build professional and consistent websites efficiently, ensuring high-quality design and functionality across all projects.

Figure 14: Logo of Bootstrap

2.2.6 PHP

PHP (Hypertext Preprocessor) is a widely-used, open-source server-side scripting language primarily designed for web development. It allows developers to create dynamic, interactive web pages by embedding PHP code within HTML. PHP can handle tasks like database interactions, form processing, session management, and content generation based on user input. It is often used with databases like MySQL to build data-driven websites and applications. Known for its simplicity and flexibility, PHP works on multiple operating systems and is compatible with most web servers, such as Apache and Nginx. Additionally,

PHP's extensive libraries and frameworks, like Laravel and Symfony, help developers create scalable, secure, and feature-rich applications.

Figure 15: Logo of PHP

2.2.7 MySQL

SQL is a standardized language for managing and manipulating relational databases. It enables users to perform a range of operations on database data, including querying information, adding new records, updating existing entries, and removing records. SQL is crucial for tasks such as designing and modifying database structures (like tables and indexes), retrieving data based on intricate conditions, and maintaining data integrity. It is extensively used in web development, business applications, and data analysis to efficiently manage and access data across different relational database management systems.

Figure 16: Logo of MySql

2.2.8 Figma

Figma is a cloud-based design tool widely used for UI/UX design, prototyping, and real-time collaboration. Throughout my internship, I utilized Figma to develop detailed wireframes and interactive prototypes for web and mobile applications. The tool's real-time collaboration feature greatly improved teamwork by enabling seamless cooperation and instant feedback. Figma's vector editing tools, along with its robust design system capabilities, were essential in maintaining visual consistency and high-quality design standards across all projects. Its versatility made it invaluable for iterative design processes and ensuring design uniformity throughout the development phase.

Figure 17: Logo of Figma

2.2.9 AJAX

AJAX (Asynchronous JavaScript and XML) is a suite of web development techniques that I employed to enhance website interactivity. By using AJAX, I was able to develop dynamic, real-time features that improved user engagement without requiring full page reloads. This approach made web applications more responsive and efficient, providing a smoother user experience across various projects.

Figure 18: Logo of AJAX

2.2.10 Laravel

Laravel is a robust PHP framework that I utilized for developing complex web applications during my internship. Its elegant syntax and comprehensive set of tools allowed me to build scalable and secure applications. My work included creating RESTful APIs, managing user authentication, and handling database migrations, which were integral to the functionality and performance of the projects I developed.

Figure 19: Logo of Laravel

2.2.11 jQuery

jQuery is a fast and feature-rich JavaScript library that I used to simplify HTML scripting. Throughout my internship, jQuery enabled me to efficiently handle events, manipulate the DOM, and create AJAX-based interactions. This library reduced the amount of code required and improved the performance of web applications, making development more streamlined and effective.

Figure 20: Logo of JQuery

2.2.12 XAMPP

XAMPP is a free, open-source software package that offers a straightforward and easy way for developers to set up a web server environment. It includes Apache (for web hosting), MySQL (for databases), PHP, and Perl, making it perfect for building and testing dynamic websites on a local machine. By combining all essential components into one package, XAMPP simplifies the setup of a development server, allowing developers to run web applications locally without needing an external server. It is commonly used for local development, testing, and educational purposes.

Figure 21: Logo of XAMPP

2.3 Assigned Duties

2.3.1 UI/UX Design for Zakath fund system Ninthavur

During my internship at Marazin (Private) Limited, I worked on designing the Zakath Fund System, focusing on creating a user-friendly and efficient platform for managing zakath funds in Ninthavur. My role involved developing a structured UI/UX design to enhance the system's usability for both donors and administrators. Using Figma, I designed key components such as navigation menus, dashboards, transaction tracking interfaces, and user-friendly forms. The system was developed to streamline fund collection, beneficiary selection, and distribution processes, ensuring transparency and accessibility. This project allowed me to refine my skills in user-centered design, responsive layouts, and accessibility best practices, contributing to a more effective and organized zakath management system.

Figure 22: Zakath UI Design using Figma

2.3.2 Zakkath Fund Management System

During my training period, I developed a "Zakkath Fund Management System" (ZFMS), a PHP-based platform designed to streamline Zakkath fund collection, management, and distribution within an organization. The system is structured with two main user roles: Admin and Beneficiary.

Figure 23: Zakkath Board Logo

System Workflow:

In ZFMS, the Admin holds the authority to create and manage Zakkath fund records, add new beneficiaries, and assign specific fund disbursement tasks to Beneficiary. When a Zakkath contribution is recorded, the Admin can define details such as donor information, amount, date of collection, and the purpose or category of the fund.

Once beneficiaries are added, the Admin can create individual support tasks (e.g., medical aid, education assistance) linked to specific beneficiaries. Each task includes support amount, description, urgency level (Emergency, Medium, or Low), and an assigned Beneficiary Manager responsible for its follow-up.

Beneficiary Managers can view their assigned tasks and beneficiaries from their personal dashboards. After completing the assigned task (e.g., delivering aid or confirming eligibility), they can submit a status update. The Admin then reviews and approves the status, marking the task as 'Completed' if appropriate.

The system helps the Admin monitor all ongoing, completed, and pending assistance tasks, ensuring transparency and accountability in Zakkath fund distribution. Additionally, ZFMS provides features to register new Beneficiary Managers, allowing smoother onboarding and delegation of responsibilities in managing Zakkath-related activities.

Figure 24: Login Page

Figure 24 shows login page. System user can input their credentials and can successfully access ZFMS dashboard.

Figure 25: Dashboard

Figure 25 shows Dashboard page. There is project, Task, Completed and Logout main functionalities can access.

Figure 26: Add Beneficiary Page

Figure 26 shows beneficiary page can add new beneficiary by filling required text field information that needs to require assign new benificiary.

Figure 37: User Details Page

2.3.3 PHP CRUD Application Development

In addition to the lead management UI, I also worked on developing a PHP CRUD (Create, Read, Update, and Delete) application. This task involved creating a simple yet functional application that allows users to add new users, update existing user information, remove users, and view detailed user profiles. The application was designed with a focus on ensuring straightforward navigation and efficient user data management.

Figure 38: PHP crud Interface with table view

Figure 38 illustrates the user interface of the PHP CRUD application, highlighting its simplicity and effectiveness in managing user data.

Through this project, I further enhanced my backend development skills and gained a deeper understanding of building functional applications tailored to meet user requirements.

2.3.4 Data Table CRUD Application Development

I developed a CRUD (Create, Read, Update, Delete) application using HTML and JavaScript with Data Tables to provide an efficient and interactive way of managing records. This application allows users to seamlessly add, edit, and delete data within a structured table format, enhancing usability and accessibility.

By integrating the Data Tables library, I implemented features such as sorting, searching, and pagination, enabling users to navigate through large datasets effortlessly. The application ensures instant feedback by dynamically updating the table without requiring page reloads, providing a smooth user experience. Additionally, I incorporated local storage support to retain data even after a page refresh, ensuring better data persistence without the need for a backend database.

Focusing on user-friendly design, I structured the interface for easy interaction and intuitive navigation. The project also emphasized performance optimization, ensuring that script execution remains fast and responsive. Through this development, I strengthened my skills in JavaScript, DOM manipulation, and Data Tables, enhancing my expertise in front-end development for dynamic data management.

2.3.4 Tertiary and Vocational Educational Commission Sample UI Design

During my internship, I worked on modifying and redesigning the sample-landing page for the Tertiary and Vocational Educational Commission (TVEC) using Figma. The primary objective of this redesign was to enhance the visual appeal, user experience, and content structure to create a more engaging and user-friendly interface.

The redesigned landing page includes well-organized sections that highlight TVEC's mission, services, latest news, and upcoming events. It features a modern UI/UX layout with a clear content hierarchy, ensuring important details are easily accessible. A contact form has also been incorporated to facilitate communication between prospective students and the institution. The use of Figma's prototyping tools allowed me to create an interactive and visually appealing design, ensuring a smooth user experience.

This project enhanced my skills in UI/UX design, wire framing, and prototyping using Figma, as well as structuring content effectively for an educational institution. By focusing on a clean, modern, and intuitive design, I was able to create a landing page that aligns with TVEC's branding while improving user engagement and usability.

Figure 40: TVEC Sample landing page UI Design

2.4 Work ethics and related issues with solution

2.4.1 Challenges

During my internship at Marazin Private Limited, I worked as a trainee UI Designer and Junior Web Developer, contributing to a web-based system project. As part of my responsibilities, I collaborated with my team to gather client requirements under the guidance of the project manager. We took detailed notes during our discussions with the client to ensure we understood their needs before moving forward with the development process.

However, we encountered some challenges along the way. The clients had difficulty articulating their requirements clearly, which led to some confusion in our planning. Managing to resolve these issues within the set deadlines posed a significant challenge, especially as I was still adjusting to the demands of my early internship stage. Despite these obstacles, I remained committed to completing my tasks within the specified timeframes.

2.4.2 Issues Encountered During Internship

During my internship at Marazin Private Limited, a growing software company in the eastern region, I noticed several challenges that impacted our work environment. One significant issue was the reliance on manual methods, as I often found myself using pen and paper instead of digital tools for certain tasks.

A key problem was the lack of resources, particularly well-equipped computers necessary for programming and UI design tasks. Additionally, a reliable and high-speed internet connection was essential for our work but was not consistently available. As a result, we often resorted to using our personal laptops to complete tasks, which limited our efficiency.

2.4.3 Issues Encountered in Training Tasks

During my internship, I worked on modifying and redesigning the sample-landing page for the Tertiary and Vocational Educational Commission (TVEC) using Figma. The primary objective of this redesign was to enhance the visual appeal, user experience, and content structure to create a more engaging and user-friendly interface.

Problem 1: Apache Shutdown Unexpectedly

During my internship, I occasionally encountered an issue where XAMPP would report "Apache Shutdown Unexpectedly." This problem disrupted my local development environment and halted progress on my tasks.

Figure 41: Apache Unexpectedly Shutdown Error

Solution:

To resolve this, I checked the XAMPP error logs for specific issues, adjusted the Apache configuration settings, and ensured that no other services were conflicting with the ports used by Apache. Restarting the XAMPP control panel often helped in re-establishing the server.

Problem 2: Laravel Package Compatibility Issues

I faced compatibility challenges with Laravel and specific packages, such as Spatie Permission, Bumbum Shopping Cart, and Intervention Image. These issues stemmed from mismatched PHP versions, resulting in installation failures and functional errors.

```
Loading composer repositories with package information
Updating dependencies (including require-dev)
Your requirements could not be resolved to an installable set of packages.

Problem 1
- Conclusion: don't install laravel/framework v4.2.17
- Conclusion: don't install laravel/framework v4.2.16
- Conclusion: don't install laravel/framework v4.2.15
- Conclusion: don't install laravel/framework v4.2.14
- Conclusion: don't install laravel/framework v4.2.13
- Conclusion: don't install laravel/framework v4.2.12
- Conclusion: don't install laravel/framework v4.2.11
- Conclusion: don't install laravel/framework v4.2.10
- Conclusion: don't install laravel/framework v4.2.9
- Conclusion: don't install laravel/framework v4.2.8
- Conclusion: don't install laravel/framework v4.2.7
- Conclusion: don't install laravel/framework v4.2.6
- Conclusion: don't install laravel/framework v4.2.5
- Conclusion: don't install laravel/framework v4.2.4
- Conclusion: don't install laravel/framework v4.2.3
- Installation request for zizaco/entrust dev-master -> satisfiable by zizaco/entrust[dev-master].
- Conclusion: don't install laravel/framework v4.2.2
- Conclusion: don't install laravel/framework v4.2.1
- zizaco/entrust dev-master requires illuminate/support ~5.0 -> satisfiable by illuminate/support[v5.0.0, v5.0.22, v5.0.4].
- don't install illuminate/support v5.0.0[don't install laravel/framework v4.2.0
- don't install illuminate/support v5.0.22[don't install laravel/framework v4.2.0
- don't install illuminate/support v5.0.4[don't install laravel/framework v4.2.0
- Installation request for laravel/framework 4.2.* -> satisfiable by laravel/framework[v4.2.0, v4.2.1, v4.2.10, v4.2.11, v4.2.12, v4.2.13, v4.2.14, v4.2.15, v4.2.16, v4.2.17, v4.2.2, v4.2.3, v4.2.4, v4.2.5, v4.2.6, v4.2.7, v4.2.8, v4.2.9].
```

Figure 42: Dependency Issue in Laravel When Installing Package

Solution:

To tackle these problems, I verified the compatibility of each package with my PHP version and Laravel framework. I updated my PHP environment to match the required versions indicated in the package documentation. When necessary, I also explored alternative packages to ensure my development progress continued.

CHAPTER 03

3.0 Introduction of Internship training

3.1 Introduction

This chapter provides my reflections on the training establishment and concludes with my insights on the Internship Program. Throughout my two academic years in the Higher National Diploma in Information Technology program, I gained a solid foundation in theoretical knowledge. The industrial training experience allowed me to put these theories into practice, significantly enhancing my skills, knowledge, and professional outlook.

During my six-month internship at MARAZIN (Pvt) Ltd. I gained hands-on experience in various tasks, as detailed in the sections below. This opportunity allowed me to develop practical abilities and gain valuable insights, which contributed to my overall performance. This experience has prepared me well for my post-graduation career path, equipping me with skills that will support my professional growth in the field.

3.1.1 Knowledge

I had little exposure to UI Design (Figma), PHP Backend and Video Editing during my academic studies, so I took the initiative to learn it with guidance from online resources and explored myself. Throughout my industrial training, I gained substantial knowledge in UI design from my colleagues and the manager, who provided valuable insights. I also developed a good understanding of prototyping as part of this learning experience.

I updated myself more with the current technologies in the market and in the process develop myself more. I also did some experiments on WordPress projects during non-working hours to test some of the new plugins and techniques which are additional to my WordPress learning. Another thing that I benefitted from was team work since it enabled me to sharing knowledge as well as gaining from

others. I update myself on the industry by reading technical literature, knowing that practice makes perfect, and practice takes time.

3.1.2 Improving practical skill

During my time at MARAZIN (PVT) LTD, reading through the code structures of teams and online platform like Stack Overflow, gave me valuable insights into effective problem-solving techniques. Observing solutions taught me how experienced developers address challenges with efficiency, which has been invaluable for my growth. I quickly realized that firsthand experience is essential for tackling complex coding issues and that learning from others' approaches can significantly improve my own. Collaborative code reviews with the team offered constructive feedback, allowing me to refine my coding style and strengthen my practical skills.

Working closely with the team was especially rewarding, as it encouraged knowledge-sharing and learning from others. I keep myself current in the industry by reading technical resources and staying engaged in continuous practice, knowing that developing mastery requires time and consistent effort.

3.1.3 Skills

- **Time Management:** Gained experience in managing multiple tasks and meeting deadlines to ensure timely project delivery.
- **Problem Solving:** Enhanced my ability to address challenges effectively, assessing risks and making informed decisions as needed.
- **Critical Thinking:** Strengthened analytical skills, particularly in logic-based problem-solving, allowing for more strategic approaches to complex tasks.
- **Written and Verbal Communication:** Developed clear, professional communication skills essential for effective collaboration with team members and clients, ensuring accurate and productive exchanges.

3.1.4 Improving leadership skill

During my training period, I developed valuable leadership skills that significantly enhanced my confidence. Presenting demos and gathering requirements from the establishment helped me communicate clearly and effectively. Speaking at team meetings boosted my ability to express ideas concisely, making me comfortable in guiding discussions and leading conversations.

Working directly with clients strengthened my leadership mindset, as I learned to take ownership of tasks, manage responsibilities, and make decisions independently. Collaborating closely with coworkers and fostering strong relationships also played a key role in supporting shared goals. These experiences prepared me to lead both independently and within a team, equipping me with essential skills for future professional roles.

3.1.5 Upgrading interpersonal communication skill

A significant part of my training focused on enhancing my interpersonal communication skills. By actively participating in team meetings, I improved my ability to engage in discussions effectively and convey ideas clearly. Working closely with clients also refined my professional communication skills, allowing me to better understand and meet client expectations.

Guidance from the CEO provided foundational insights into respectful and effective interactions with both clients and colleagues. Additionally, participating in online meetings gave me the opportunity to adapt my communication style to different virtual settings and helped build my confidence when speaking to varied audiences. These experiences have been invaluable in strengthening my communication abilities for a professional environment.

3.2 Work ethics and related issues

3.2.1 Challenges

I have a strong interest in developing WordPress sites, which aligned well with the projects assigned by the establishment and my academic focus in IT. Alongside web development, I was also given tasks in video editing, such as editing feedback and creating logo animations. This required me to take on multiple roles within the company, balancing both web development and video editing.

A particular challenge I faced was Meeting WordPress project deadlines while juggling multiple tasks was demanding, but it helped me build time-management skills and adapt to a dynamic work environment.

3.2.2 Issues

During my training, I faced several challenges while working on multiple projects, including video editing and WordPress development. Managing the time constraints of each task was particularly tough, often leaving me feeling stressed and overwhelmed. Balancing both video edits and WordPress development meant meeting deadlines on various assignments, and at times, the quality of my work suffered as a result. Additionally, client requests for immediate revisions added to the workload, requiring me to switch focus quickly between video edits and website corrections. One of the more frustrating challenges was when clients would pause or withdraw projects mid-design or development, adding extra pressure to the schedule. These experiences ultimately helped me improve my time management skills and resilience, key assets in growing professionally.

3.2.3 Constraints

At the time during my training period, I encountered some constraints which influenced my work. Strict deadlines for completion of projects that must be met by the use of effective time management to achieve deliverables. In addition, the company faced several constraints impacting its operational efficiency. The computer, scanner, and printer were not of sufficient quality and often unusable, which hindered the company's ability to meet workflow requirements effectively. As a result, I brought my own laptop each day to ensure tasks could be completed smoothly.

3.3 Conclusion

In conclusion, I extend my heartfelt gratitude to both the Almighty and the management of MARAZIN (PVT) LTD for their support in completing my internship successfully. This experience has provided invaluable hands-on training in Information Technology and offered me the opportunity to learn directly from industry professionals. Through the structured internship curriculum, I was fortunate to gain practical exposure at a rapidly growing IT company in the Eastern Province, aligning well with today's increasing need for practical skills over solely theoretical knowledge.

Over the six months at this software development company, I enhanced my skills and broadened my understanding within a real-world business environment. This internship has established a strong foundation for my future career, and I am honored to have contributed in a meaningful way during a critical period in our nation's history. Expanding this model of experiential learning to other fields would surely benefit many aspiring professionals across disciplines.
